The two top main reasons that I choose northwest university is the course curriculum offered by the university and checked each subject that will give practical knowledge that one can sustain in the competing world and the best university in the country. Second reason, the geographical location of the university, our university is in mid-western of the United States and have good climatic conditions. I will be living for about next three years at least in this state. The culture of the Northwest and the American students at this place are ecofriendly that can support and help in all the situations.

I thought that studying in national ranking universities like Northwest that can give more practical knowledge boost up in cracking the interviews. This university provide a chance to motivate and strengthen in studies that can achieve a good grade. Honestly speaking I have applied to many universities but that universities that I find is lack of curriculum that do not support elitist institutions.

The best professors at this university are very friendly and they can teach in very understandable manner and kept every student in their mind to strengthen their skills. Mostly, the professors at universities can teach only the subject but at Northwest they can teach practical, behavioral, interview skills that can help in future. The professors in Northwest are updating their course and teach the updated versions and clearly teaches to the students of non it background. As I am completed my bachelor's in mechanical engineering in 2020 then I started learning programming languages and then I admitted into Northwest. I spoke to many senior students they suggested that MS ACS is the best course the subjects in this course are helpful throughout in career.

I love everything about the place of Northwest. Firstly, the campus, this campus is associated with all the facilities like huge library this library places ranking in the world. This place is having books of motivating and inspiring and technical books. Secondly, the sports campus I like badminton team in the university, I am a big supporter and play if I get a chance to play in the team. I am very fascinated about the foot ball team that is a great team win many medals throughout the country. This University is having a great social media that can update every minute. This also helps in providing news, journals, articles, presentations.
